A Personal Endorsement Letter for Dr. Sarah Sun Liew for Republican candidate for the United States Senator from California

It is an honor and a pleasure to express my appreciation for Dr. Sarah Sun Liew's efforts to become the Republican Party's nominee for the United States Senate seat in California. Sarah will be a welcome leader, in my opinion as a US Senator. Sarah's entrepreneurial talents, substantial education, volunteer work in the community, and faith-based community leadership all contribute to her attainment of the American Dream. Sarah is a conservative community leader who wants to return California to its core values and character traits that will ensure everyone's success in life. Sarah is committed to ensuring that every Californian has access to a high-quality public education.

Sarah is also highly committed to everyone in California enjoying access to affordable, high-quality healthcare. Sarah will ensure that every student in the state gets access to a Moment of Silence for a minute of reflective thought. Sarah plans to bring professors and executives from Asia's IT semiconductor business to California to work on the next generation of these critical technologies. Sarah is in a good position to connect with semiconductor experts in Korea, Taiwan, Japan, China, and Israel to work on resolving the pervasive and persistent supply chain issues that are currently obstructing the global semiconductor supply chain and posing threats to our country's national security and human security. Sarah plans to achieve her objectives by collaborating with faith-based community programs.

Sarah will work to ensure that California follows through on its sovereign right to be as welcoming as possible to DACA recipients and their families, as well as deported American veterans, by ensuring that the state welcomes those who have always considered themselves our fellow Americans, or who can demonstrate genuine rehabilitation as a contributing member of society. Sarah will fight for restorative justice, health equity, and the restoration of the Constitutional dream of a united America where everyone has an opportunity to succeed. I am happy to support Dr. Sarah Sun Liew because I am a firm believer in the traditional Korean work ethic, faith-based values, and personal character.
